

WWW.JOHNNY-GREEN.COM

WHO WE ARE?

Johnny Green is the best cannabis grower in the world. For many years Johnny Green have been growing, blooming, flushing and harvesting the best buds around.

Now it's time to share some of the secret ingredients and help the cannabis growers community to reach the best possible plant with the highest yield possible.

HOW THE MAGIC WORKS?

Johnny Green products contains everything cannabis plant needs and much more. With special ingredients such as Calcium, Magnesium, Humic Acids and other secret elements, Johnny Green is proud to deliver the best possible nutrients for your plant to reach his maximum potential.

Those products have been used and tested on medical cannabis, and it's proven to optimize your growing cycle, for maximum yield and top quality buds.

WHY JOHNNY GREEN?

Because, just like Johnny Green, you love cannabis and know how to grow it, It's time to use the best products, those that have been tested on medical cannabis world wide, and guarantee maximum yield and top quality buds.

Johnny Green will not only maximize your plant to the highest possible yield, but will also get your cannabis plant to a whole new level. Using this product will get you the best possible nutrition needed to achieve top quality aromatic medical grade buds.

You are about to experience a whole new and unique way of growing cannabis and I am here to help you at every part of the growing cycle.

SYMBIOTIC RELATIONSHIP WITH PLANTS

Mycorrhizo is Johnny's personal obsession. Thanks to Mycorrhizo, but not only it, Johnny has become a living legend. The Mycorrhizo fungi produce a productive symbiosis with the roots of the cannabis plant and build another network of fungal mycelium, which is an additional adsorption, besides the hairs of the plant roots. Regular use of Mycorrhizo will help your cannabis plant absorb more of the fertilizer and minerals from the substrate while using less energy. This will enable rapid growth and the maximum yield in the highest possible weight and quality. The mycorrhizo fertilizer will help you grow the maximum yield of the best quality possible. This fertilizer has been tested on medical cannabis and is guaranteed to generate the maximum yield.

COCONUT CUBES FERTILIZER

Johnny understands the plant and the substrate. He feels the substrate and imagines how the root feels in it. Johnny Green also knows all the substrates up close and personal, yet he prefers to grow on coconut cubes - those that come in a package for using as a flowerpot. The most sterile and the easiest to transport.

The first thing you should know about compressed coconut is that after opening in water, you need to let it “run” for a few days with water and fertilizers before planting since the substrate annexes fertilizers and ions. If you don’t “restart” it with fertilizers before planting, the plant won’t have the substances it needs for growing. It’s a simple and easy action.

Johnny produces the best fertilizer for Johnny Green’s coconut cubes, a super-concentrated fertilizer that is designed for a fertilizer-annexing substrate like coconut and comes in two bottles in a classic formula.
